A sports league recorded one season of basketball stats for 10 players. Each row is one player. (Made-up data)

Player ID	Age	Position	Height (cm)	Games Played	Minutes Per Game	Points Per Game	Rebounds Per Game	Fouls Per Game	Injured
P01	24	Guard	188	72	31.5	14.2	3.1	2.4	No
P02	27	Forward	203	68	33.0	17.8	7.4	2.9	No
P03	22	Gaurd	185	75	28.4	11.6	2.8	2.1	No
P04	30	Center	211	64	29.1	9.7	10.2	3.4	Yes
P04	30	Center	211	64	29.1	9.7	10.2	3.4	Yes
P05	25	Forward	201	150	34.2	18.5	6.9	2.7	No
P06	29	Guard	190	70	35.6		4.5	2.2	No
P07	23	Center	208	58	24.8	8.9	9.1	3.8	Yes
P08	26	Forward	198	77	36.9	38.2	8.3	2.6	No
P09	31	Guard	183	66	22.7	7.3	2.2	1.8	No

Quiz 3

Dataset 5: this table has data problems. Clean it before anyone uses it.

1. **Find every data problem. For each one, write the row, the column, and the type: missing, duplicate, typo, junk, or outlier.**
2. **For each problem, say what you would do (fix, fill, remove the row, or keep) and give one reason.**
3. **One number is blank. After removing the duplicate and junk rows, calculate the median of that column and write the value you would fill in. Show your work.**
4. **How many rows are left after cleaning? List their Player IDs.**
